SUMMARY

Software Developer (Fresher / MCA Student) with hands-on experience building full-stack web applications using Python, Django, HTML, CSS, basic JavaScript, and MySQL. Experienced in developing user-centric interfaces, implementing authentication, CRUD-based admin dashboards, and data-driven features. Skilled in database design, responsive UI/UX development using Bootstrap, Tailwind CSS, and Figma, and version control with GitHub. Known for strong problem-solving, clear communication, and the ability to collaborate effectively in team-based environments while continuously learning and improving.

PROFESSIONAL EXPERIENCE

Amoha Recruitment Services, AH, GJ   **Jun 2024 - Oct 2024**
Bench Sales Recruiter

- Profile Marketing: Actively marketed candidate profiles to potential clients, highlighting skills and experiences to secure job placements and enhance client satisfaction.
- Networking and Relationship Building: Established and maintained relationships with clients and industry   contacts to understand their hiring needs and promote available candidates effectively.
- Processed Market Research: Conducted thorough market research to identify trends and opportunities in the recruitment landscape, enabling targeted marketing strategies for candidate profiles.

EDUCATION

Higher Secondary(12thcommerce)   **Aug 2023 - May 2024**
The H B Kapadia New High School - **(69.33 %)**

MCA (Integrated) Information Technology   **Aug 2024 - Present**
  L.J Institute of Computer Applications
   Majors: Core IT and Computer Applications

- Trained in computer applications with a special focus on UI/UX design to create simple, attractive, and user-friendly applications
- Specialized in data management systems and the integration of AI and cloud computing to tackle modern IT challenges.
- Specialized in web development technologies (HTML, CSS, JavaScript, Django) to create dynamic and responsive websites.

Project: Online Food Ordering & Restaurant Management System (Django)

- Engineered a full-stack Django web application with secure user authentication, dynamic menu display, cart management, and online table booking for restaurant operations.
- Designed and optimized relational database models using Django ORM to manage users, orders, menu items, and reservations with efficient real- time query handling.
- Built responsive, mobile-first user interfaces using Bootstrap, Tailwind CSS, and JavaScript to ensure smooth cross-device ordering experience.
- Developed admin dashboards with complete CRUD functionality for managing users, orders, bookings, and menu inventory without direct database   access.
- Implemented session-based authentication, data validation, and order persistence across user sessions to ensure reliable and secure transactions.

Certifications

- **Coursera:** Mastering Laravel Framework and PHP, JAVA, C Programming Fundamentals, HTML5
- **Reliance Foundation:** Security Analyst
- **Forage:** Data Analytics job simulation, Cybersecurity Analyst job simulation

TECHNICAL SKILLS

Programming (Frontend): Python, Java, UI/UX Design, Figma, Draw.io, HTML, CSS, JavaScript (Basics)
Programming (Backend): Django, Laravel, Basic Data Structures & Algorithms (DSA)
Databases: Database Management Systems (DBMS), MySQL, MongoDB
Tools & Technologies: Figma, Draw.io, GitHub, VS Code, Canva (for UI mockups)
Professional Skills: Strong Interpersonal Skills, Excellent Communication, Good Teamwork & Collaboration, Organised and Detail Oriented, Proactive and Self-Motivated
